

What was I?

DIRECTIONS: Solve each problem below and then find your answer in secret code. Each time your answer appears in the secret code, write the letter of the problem above it.

BACKGROUND INFORMATION: I was 13 feet from my nose to my tail, and I stood about 6 feet tall. I had a sickle-like claw on each foot which I used to tear open the stomachs of other dinosaurs during combat. My claw toe stayed off the ground when I ran to keep from being broken or dulled by the underbrush. My large, sharp teeth curved backward, giving me the ability to tear huge chunks of my prey's flesh.
