

- 9) Hank did not plan his finances well for his day in the city. First, he spent half of his money on breakfast. Then he spent half of what was left on his train ticket. Once in the city, he spent half of what remained on a subway token. Then he checked his finances after drinking a 75 cent glass of juice. He had only 50 cents left! How much money did Hank have with him when he started the day?
- 10) A frog jumped on several stones on his way to the pond. He did not land on the same stone twice. The product of all of the stones that he hopped on was 19.635. On which stones did he jump?
