

NeSA-R Results 2009-2010

Reviewing the Data

More Data will be released on October 1st
with the State of the Schools Report!

What the tests mean??

- NeSA-R (3-8, 11)—a snapshot of student performance on selected grade level comprehension and vocabulary skills.
- What is a Scale Score??
- What do Below, Meet, and Exceeds Standards Mean??

Goals for the Data

- Use as BASELINE DATA for Reading and Writing Achievement in elementary, middle, and high school
- Review specific, building level, student-level data as part of the PLC experience
- Identify trends in the data to make instructional adjustments when needed

Strengths

- The average scale score for BPS grades 5 and 8, NeSA-R was above the state average.
- BPS results on the NeSA-R are very closely aligned to the state average and are fairly comparable to other Sunland area schools' results!

Opportunities for Improvement

- Some of our scale scores warrant looking at various approaches to teaching different reading strategies.
 - Implement strategies in reading to enhance instruction and engagement for students K-12
- We will look for ways to address all the academic needs of our students who fell “Below Standards”
 - Review curriculum expectations for reading and reading interventions, as well as review the interventions being used by classroom teachers and interventionists.
 - Explore how to implement more extensive reading intervention opportunities for students in MS/HS
