

A Checkbook Ledger

Marie opened a new checking account. Every time she wrote a check she had to write it down on the ledger. Then she had to subtract the check to see how much money she had left in her checking account. Marie wrote her checks for February on the checkbook ledger below.

Directions: Subtract each amount in the column on the right. Find her balance at the end of February. One check is done for you.

CHECKBOOK LEDGER				
Check	Date	Record of Checks Written	Amount	Balance
